

**REMARKS**

Claims 1-21 are currently pending in this application. Claims 1-21 are rejected. It is respectfully submitted that the pending claims define allowable subject matter.

Claims 5 and 13 have been rejected under 35 U.S.C. § 112, second paragraph. Claims 5 and 13 have each been amended herein to recite "said providing the instruction to control the peripheral device". As amended, claims 5 and 13 are each submitted to satisfy the requirements of Section 112, second paragraph. Applicant therefore requests that the Section 112 rejection be withdrawn.

Claims 1-3, 5-11, 13-19, and 21 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over Applicant's Admitted Prior Art found in the U.S. Patent Application Publication No. 2005/0114568 A1 of the instant application no. 10/722,914 (AAPA) in view of U.S. Patent No. 7,180,619 (Ferlitsch). Claims 4, 12, and 20 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over AAPA in view of Ferlitsch, and further in view of U.S. Patent Application Publication No. 2002/0063880 (Raney). Applicant respectfully traverses these rejections for at least the reasons set forth hereafter.

Independent claims 1, 9, and 17, and dependent claim 16, have been amended as discussed with the Examiner on July 7, 2009 to place claims 1-21 in condition for allowance.

In view of the foregoing amendments and remarks, it is respectfully submitted that the cited references neither anticipate nor render obvious the claimed invention and all of the pending claims in this application are believed to be in condition for allowance. Reconsideration and favorable action is respectfully solicited.

Respectfully submitted,

Charles H. Livingston, Registration No. 53,933
